

The Library should expand the number and coverage of databases available through the InfoNet.

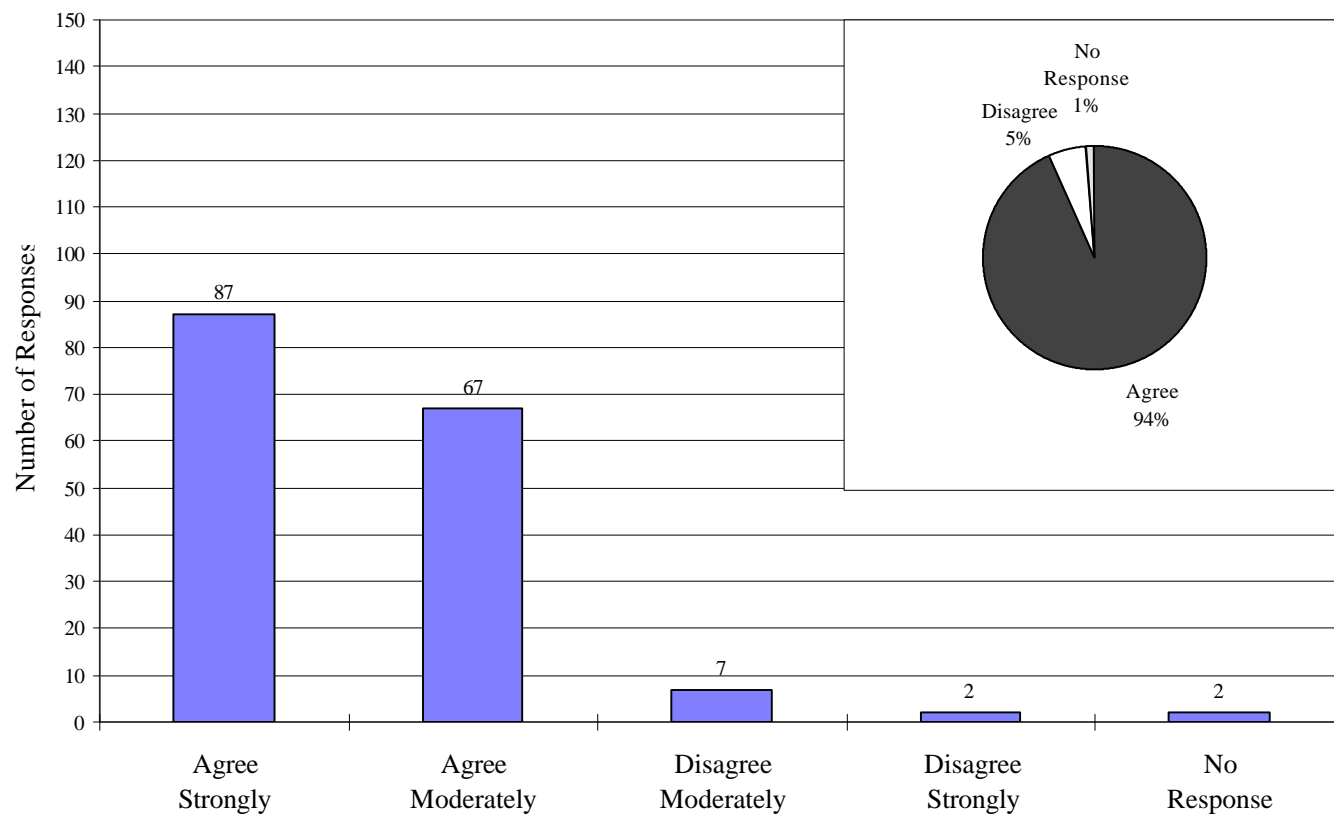

Total Responses: 165

The Library should expand the number of journals available online (e.g. through InfoWeb and TORPEDO).

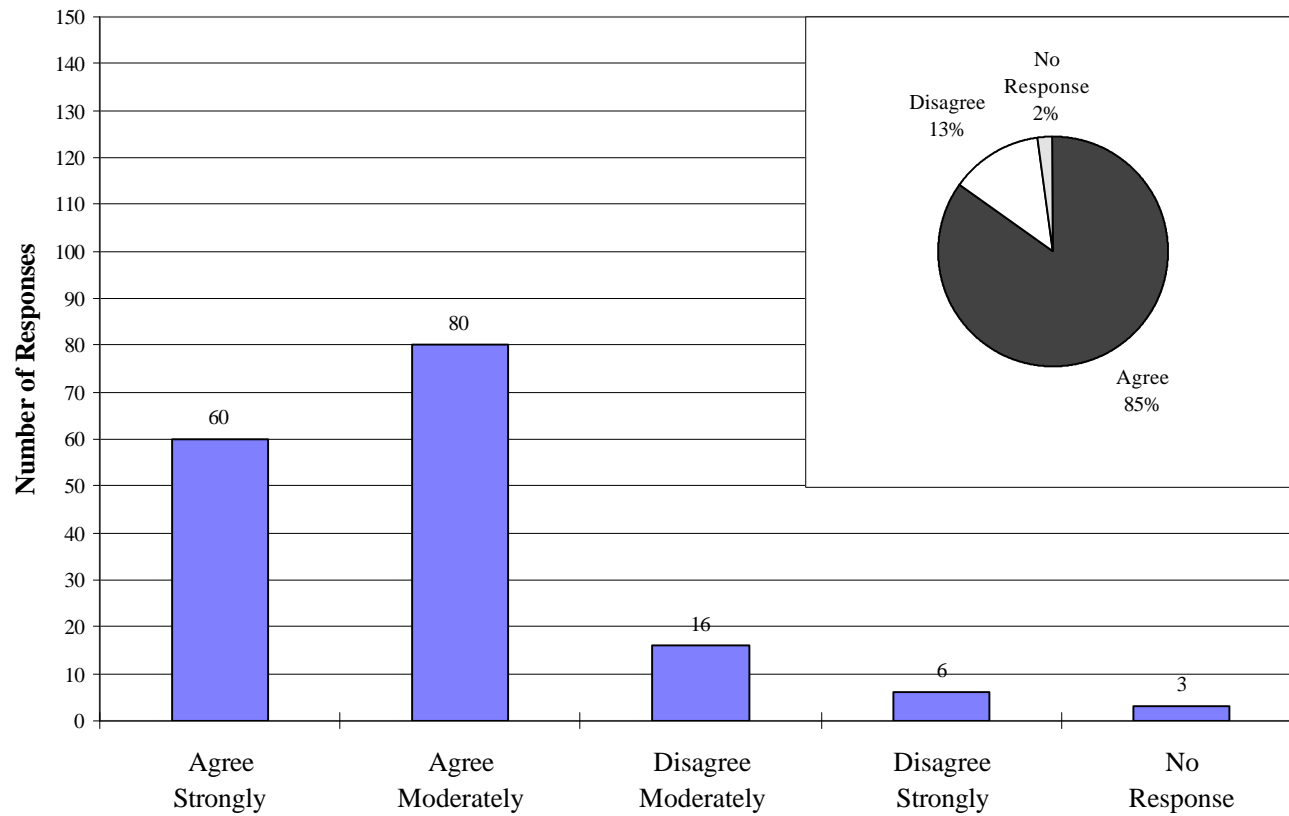

Total Responses: 165

The Library should expand the number of technical reports available online (e.g. through InfoWeb and TORPEDO).

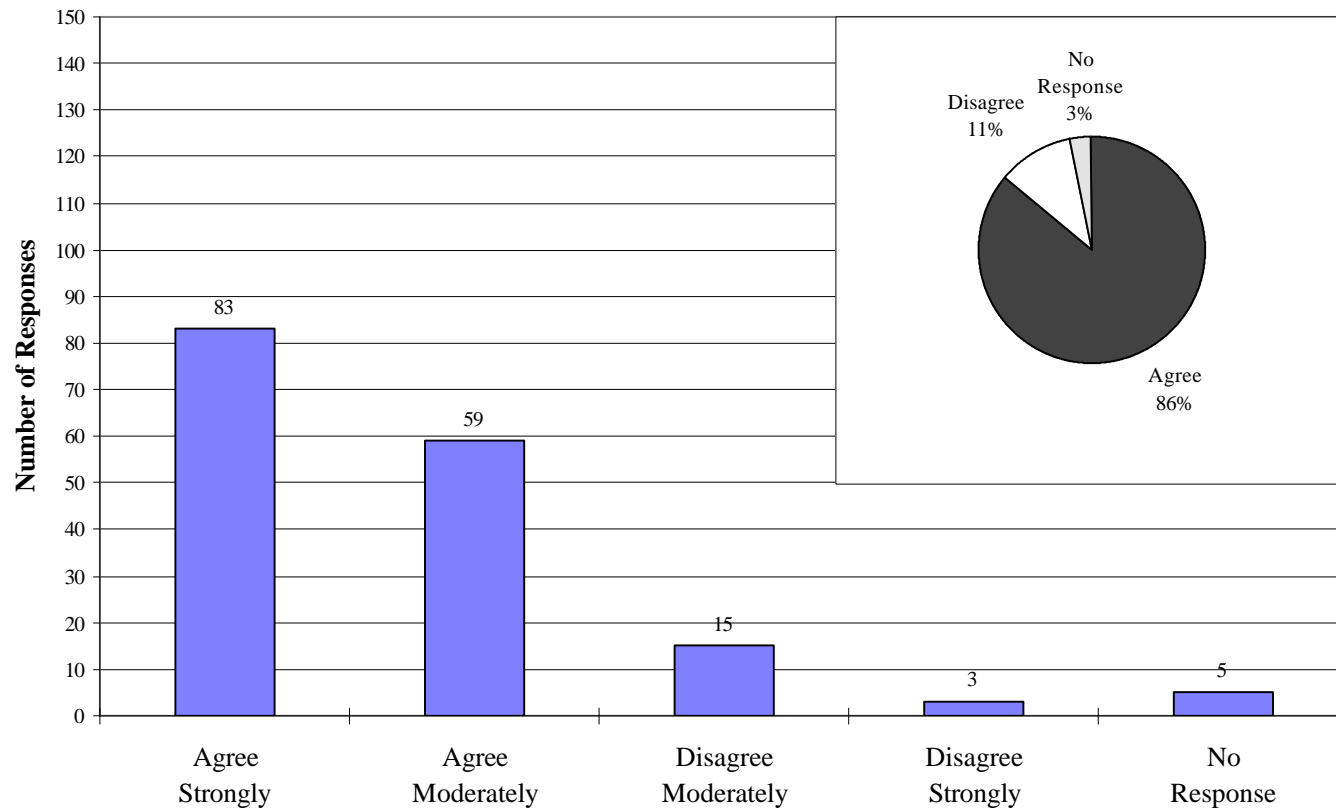

The Library should expand the types of information available online (e.g. add NRL Directives to TORPEDO).

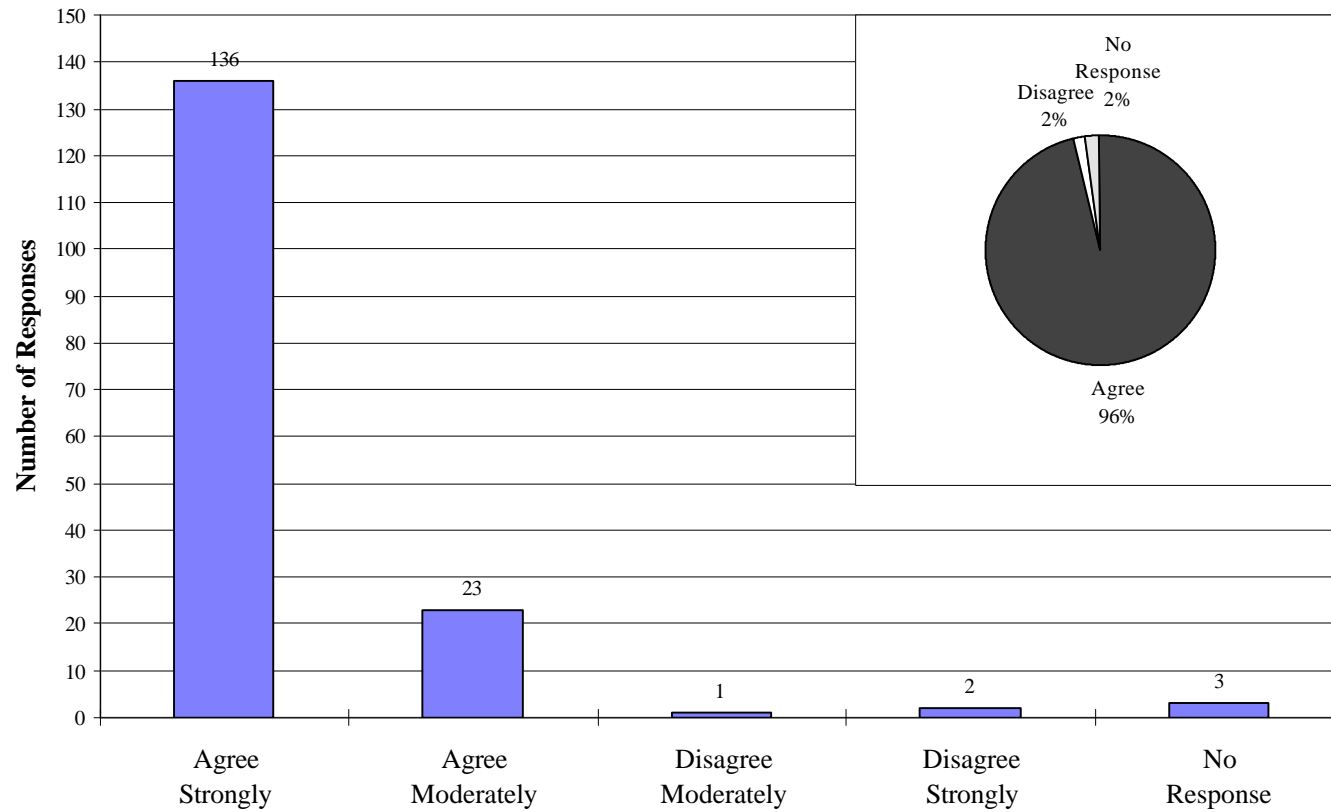

Total Responses: 165

The Library should evaluate, select, and organize digital information just as it currently does print-on-paper.

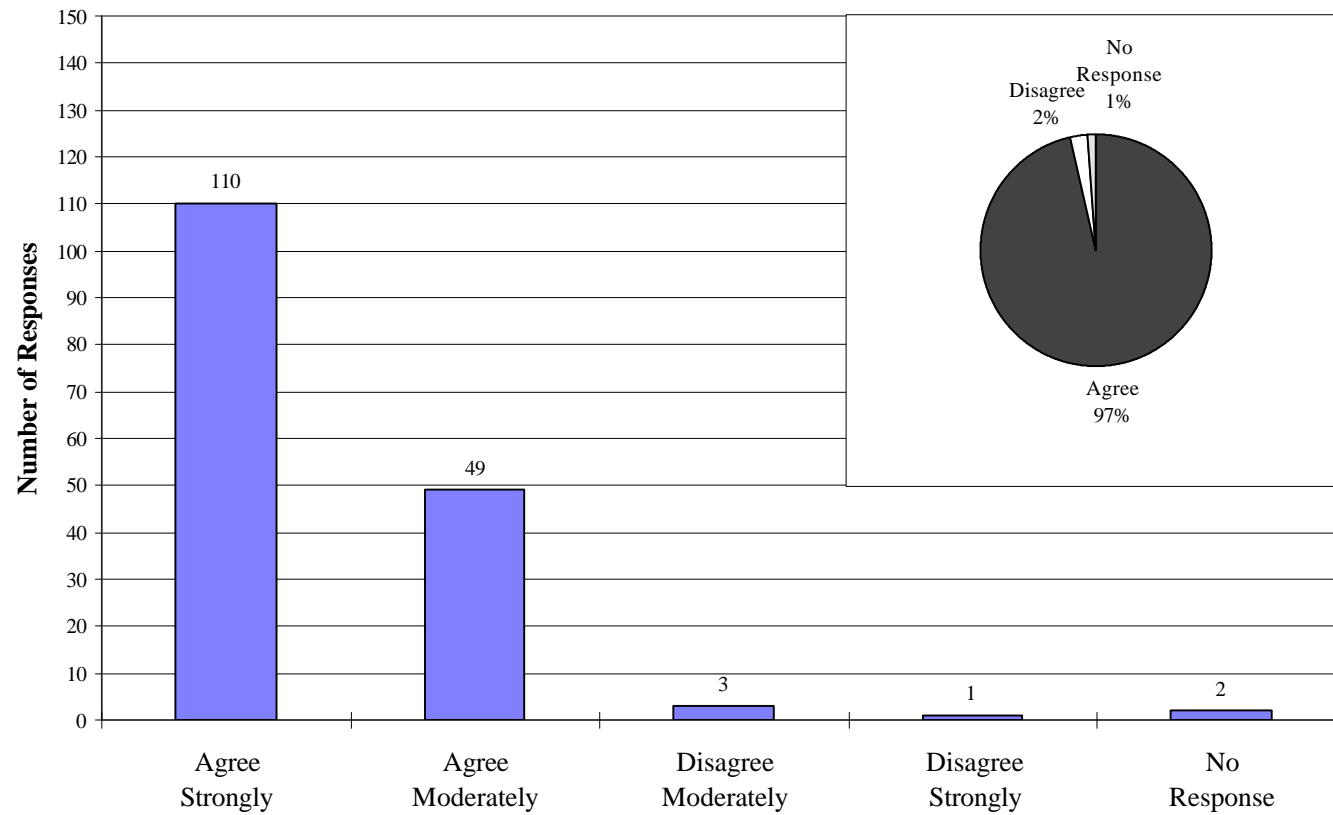

Total Responses: 165

The Library should develop and implement systems that provide the end-user with desktop access to information.

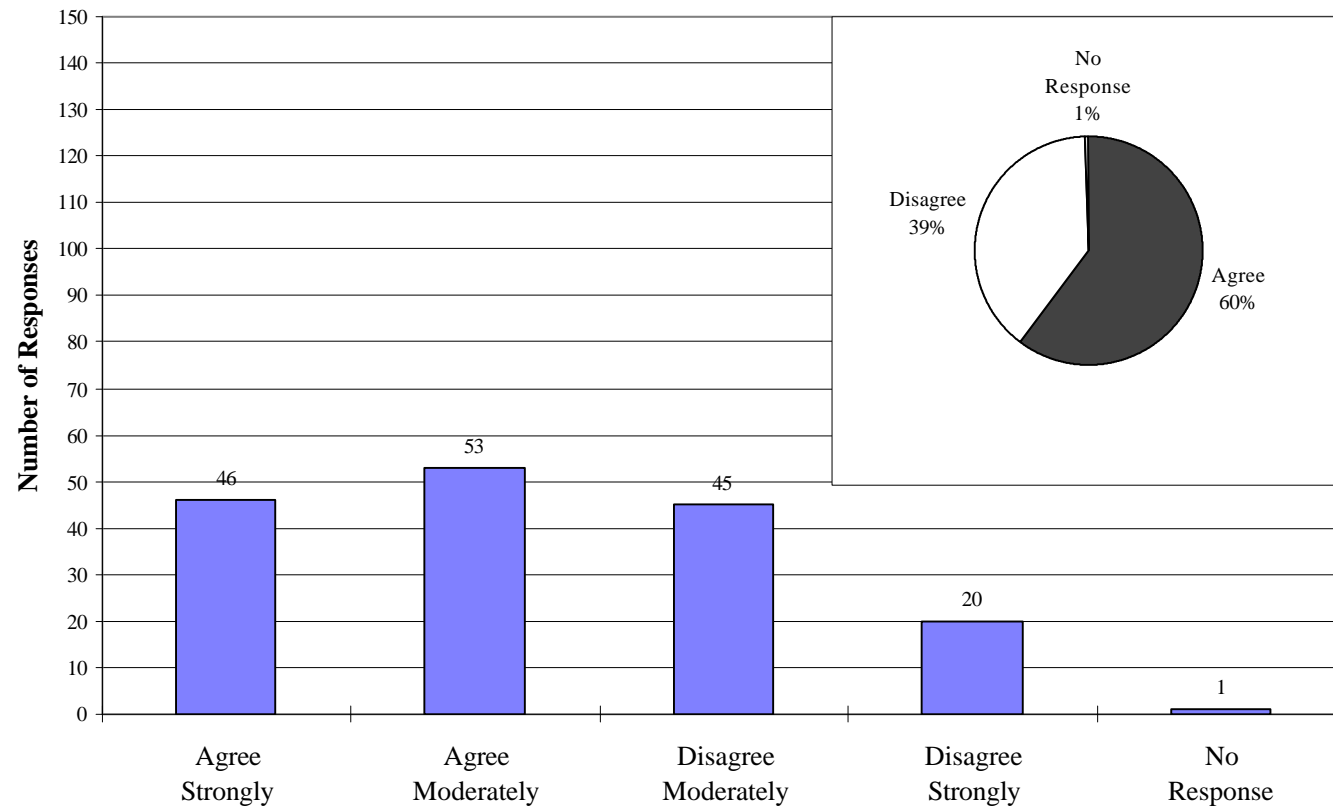

Total Responses: 165

The Library should expand access to journals in electronic format.

Total Responses: 165

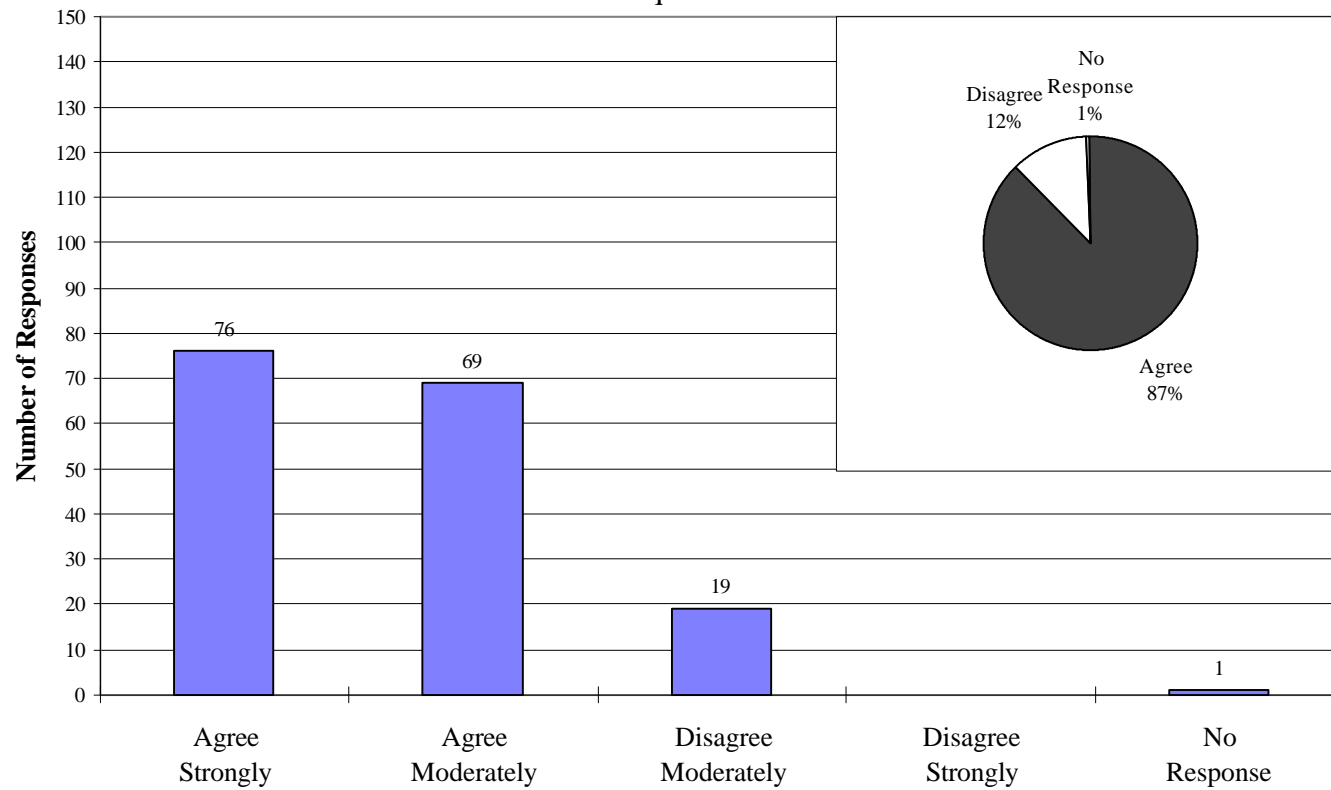

The Library should cancel subscriptions to journals in print format that are available electronically should budget constraints preclude subscribing to both.

Total Responses: 165

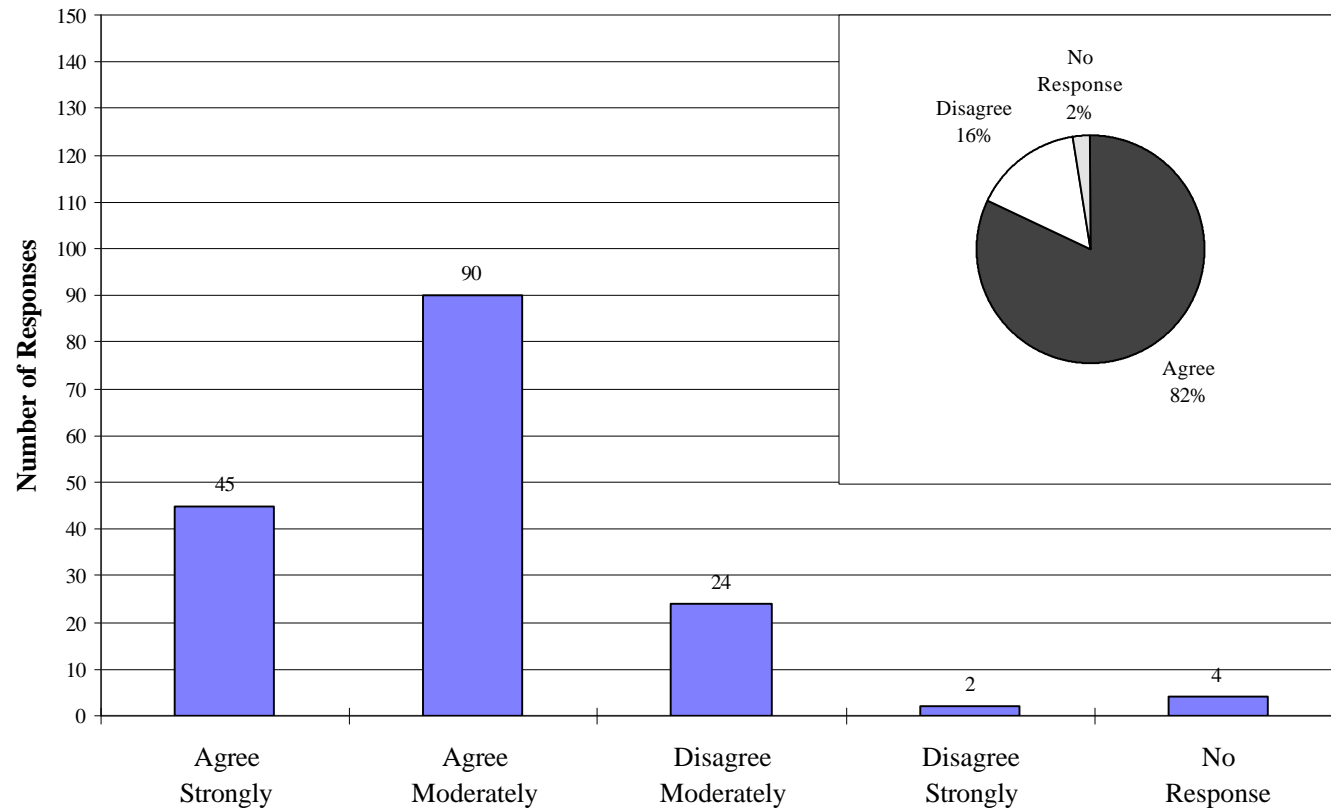

The Library should assist users in resolving connectivity and configuration issues in using Library systems by providing help desk support and in-office support as required.

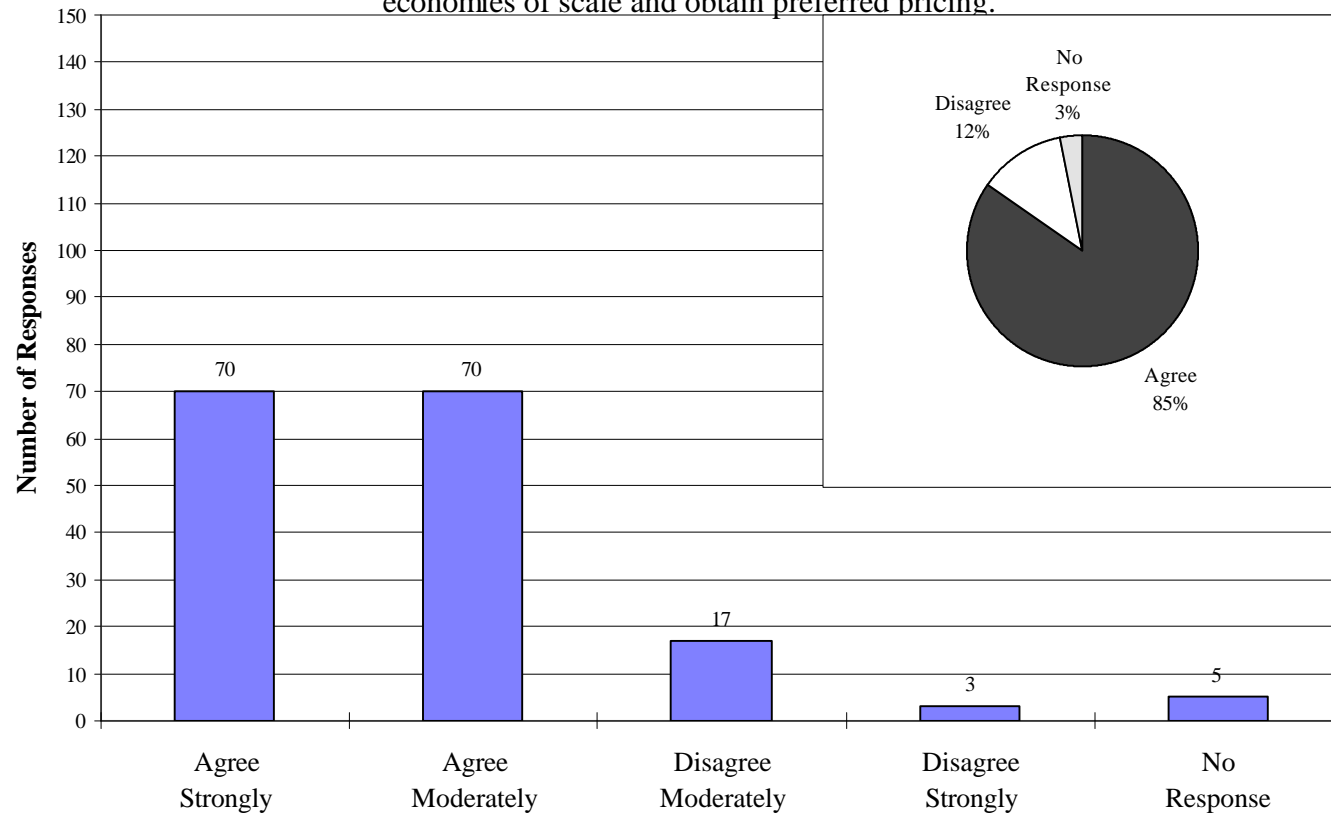

Total Responses: 165

The Library should provide formal training in the use of Library Systems.

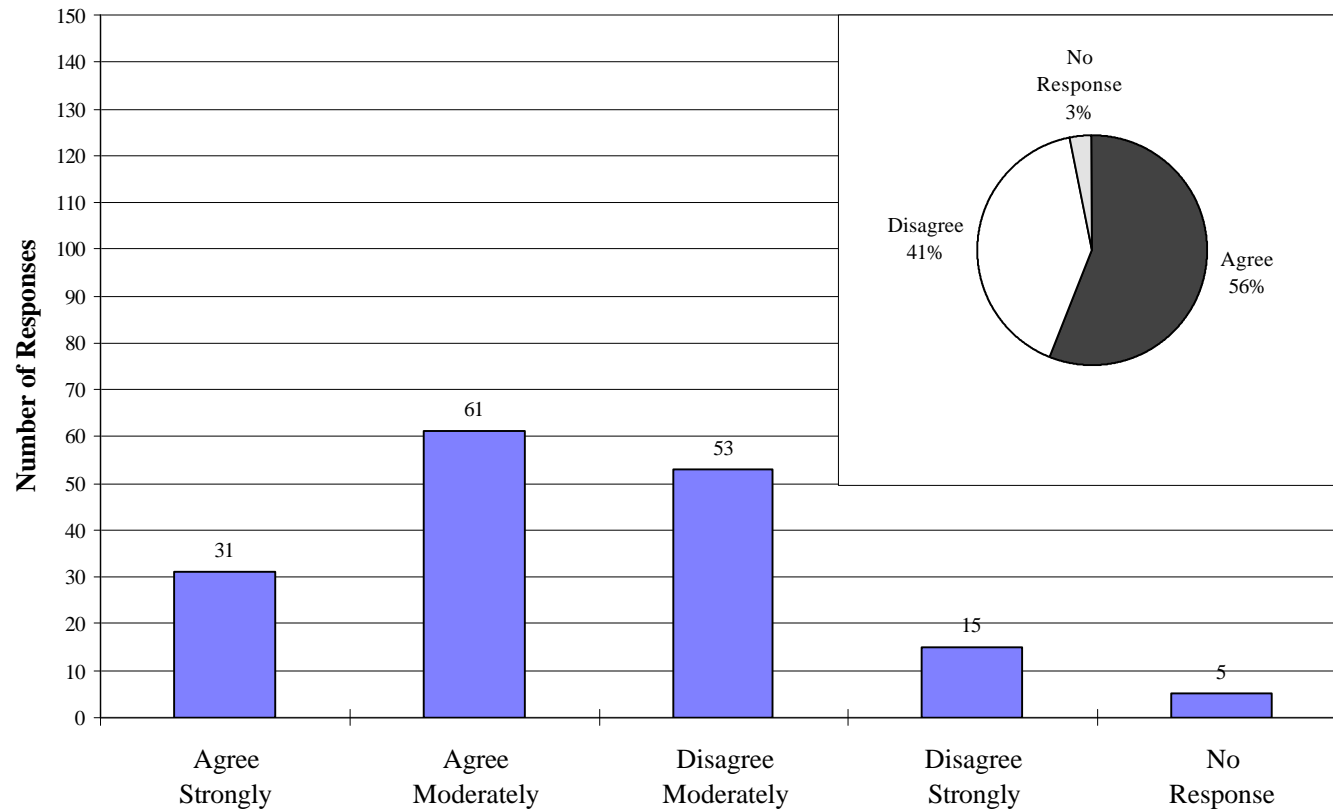

Total Responses: 165

The Library should seek to consolidate Laboratory expenditures for information to improve its negotiating stance with publishers and other vendors to achieve economies of scale and obtain preferred pricing.

Total Responses: 165

The Library should assist researchers and administrators in managing their in-office information files by providing digitizing, storage and retrieval services.
